Web, Android, iOS

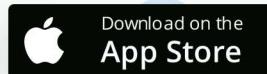

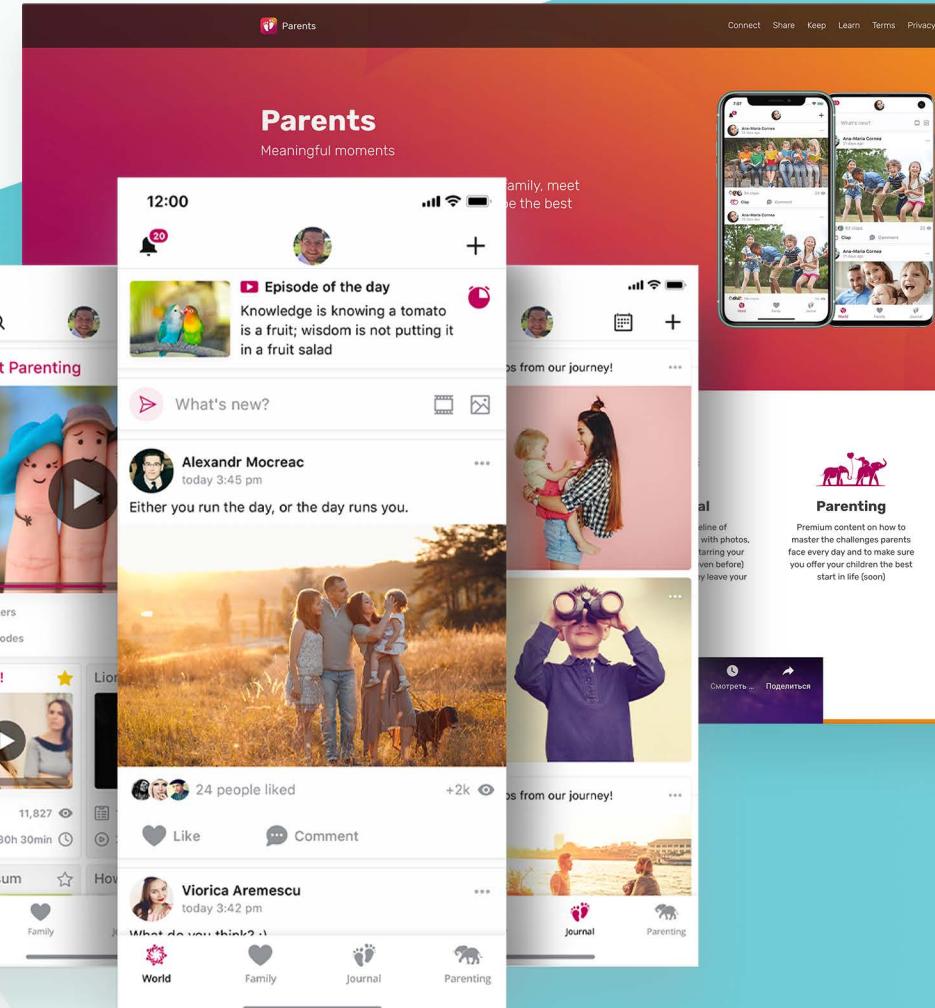

Parents

Multi-Sided Social Media Platform: "Parents" is a social media network developed by and for those who are or are about to become parents. Network users can build private family groups, share pictures and videos of their meaningful moments with life partners, develop event timelines or media mock-ups for their circle and keep an experience journal. Users can also join various communities for parenting guidance, whilst exploring educational libraries on how to become a better parent and nurture more meaningful events within their family. The platform is delivered as a multi-sided system available on Web, Android and iOS.

Used Technology: Docker, Kubernetes, GIT/GitLab, Sentry, NGINX, Django, Celery, PostgreSQL, SSO
Powered by Django & MongoDB, RabbitMQ Acuity Scheduling, MobilPay, Flutter

parentsapp.co

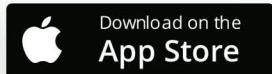

Hastnet Web

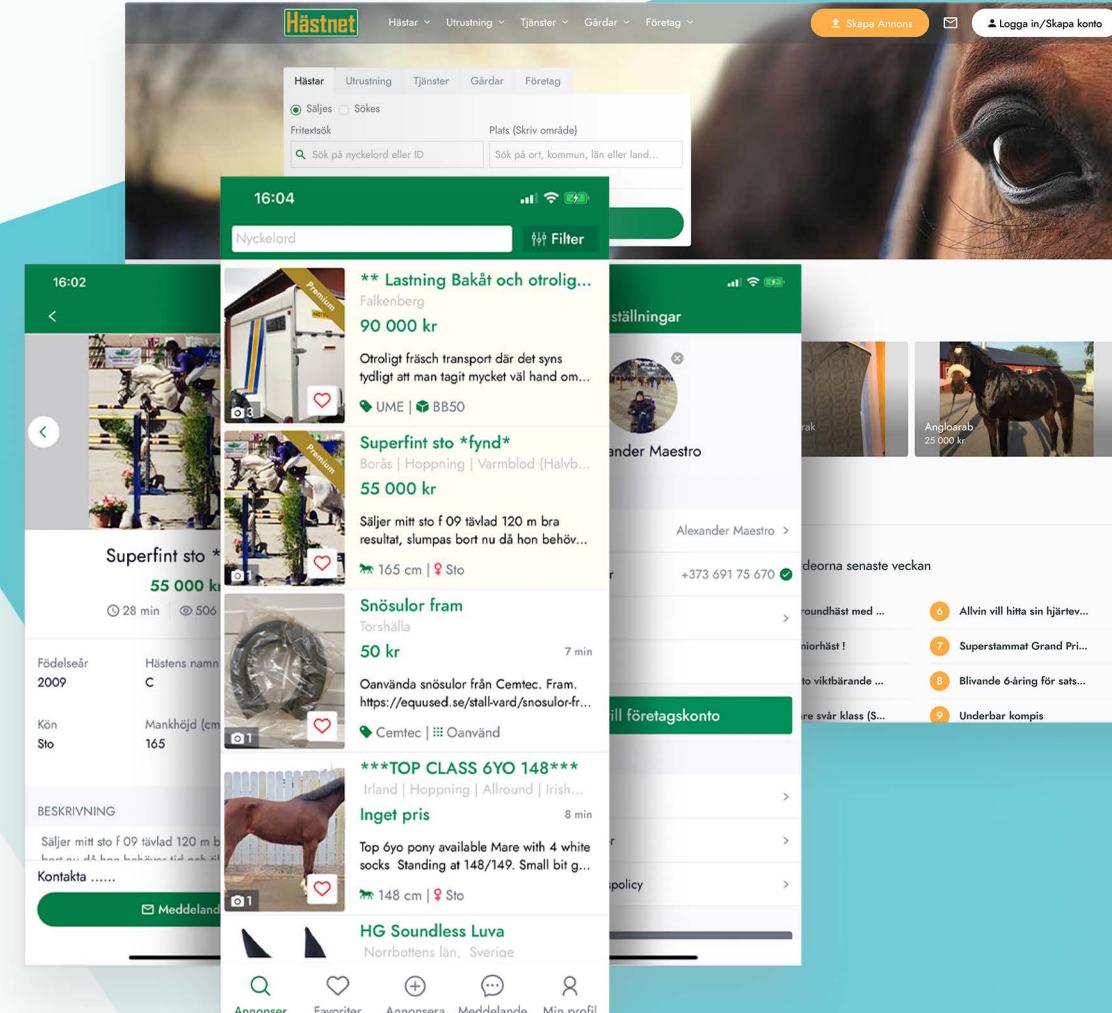

Multi-tier system: Private Backoffice, User Portal & Web Interface, Android & iOS Apps

Hastnet is Europe's largest marketplace for horses and everything related to horses. The platform itself allows elements of livestock trading, management and maintenance while acting as a multi-tier service that connects sellers, buyers, enthusiasts and veterinarians.

Used Technology: HTML5, CSS3, Node JS, ExpressJS, React JS, Mongo, Redis, MySql, RabbitMQ, Android Java, Android studio; Xcode, Swift

hastnet.se

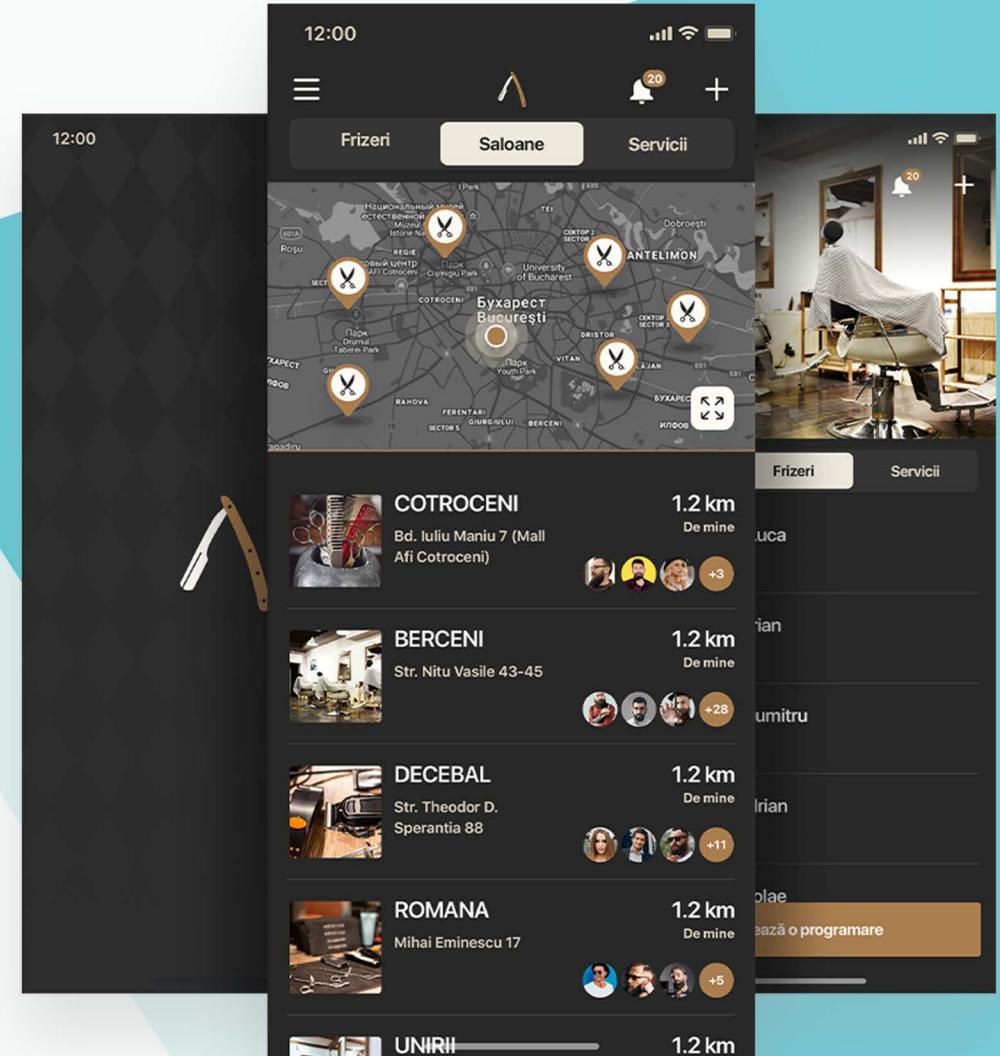

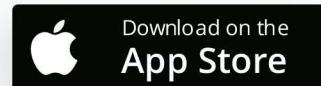

The Original Barber Shop

Multi-tier system: Private Backoffice; Android; iOS

"The Original Barber Shop" is a subscription, appointment and order management system designed for top-shelf barbers in Romania. Currently, the system is a multi-tier MVP and is released as a business proof of concept. The system handles more than 1000 subscriptions and over 500 reservations a day.

Used Technology: HTML5, CSS3, Flutter, ReactJS, Phyton Jango, Acuity

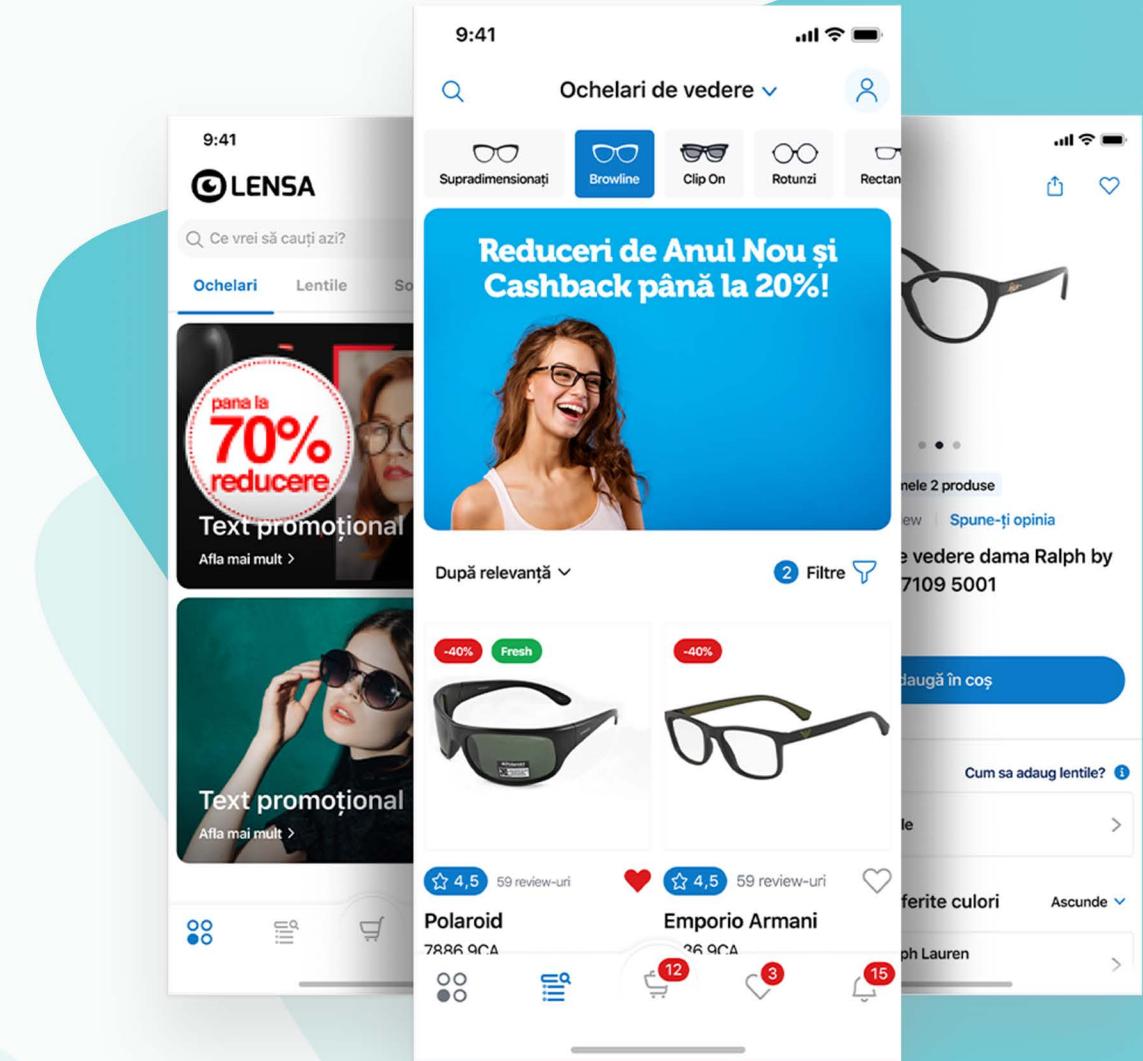

Lensa

Multi-tier system: Private Backoffice; Android; iOS

Lensa allows its users to collect, store info about specific products such as contact lenses, eyeglasses, and accessories.

The app allows recurring and new customers to obtain discounts and keep-up with stock availability for their desired items.

Used Technology: HTML5, CSS3, Flutter, ReactJS, Phyton Jango

Asante

ASANTE is on a mission to revolutionize social media culture by creating a digital ecosystem of 'kindness'. Their platform provides a socially responsible digital ecosystem alternative - connecting users around their shared causes, community impact and gratitude towards those who are empowering them to engage in service and socially conscious enterprise. ASANTE provides the backbone and binding that affects positive change and creates a kinder world.

Used Technology: Docker, Kubernetes, GIT, GitLab, Ansible, Terraform, Graylog, Sentry, Daemon Monit, Java, OpenJDK8, Python3, Spring Boot, Django DRF, Django Unit testing, Junit, JSON, MongoDB - NoSQL, PostgreSQL, Amazon Quantum Ledger Database (QLDB), JSON Web Tokens (JWT), RabbitMQ, ReactJS, Ant Design (AntD), Swift 5, VIPER Architecture, Firebase Crashlytics, Fabric/Google App Distribution, XCTest, Kotlin, JUnit, Mockito, Dagger2

Eurasia Precept

Eurasia Percept is an online learning platform that allows instructors to keep track on academic progress for their students, as well as centralize operational procedures for both: management and operations of the Percept Institute. The platform allows curriculum delivery, storage, contextual learning suggestions, administrative edges such as student ops (admission, class schedules, progress tracking, graduation, expelling, etcetera) and administrative ops. Besides delivering online convergence for teachers, students, and the institute (from the managements perspective) Eurasia Percept acts as an online store for its stakeholders, to deliver access to curriculum-based and context-related materials for students and teacher alike!

Used Technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, Monit daemon, NGINX, Python, Django, PostgreSQL, RabbitMQ, ElasticSearch, MongoDB, ReactJS, Ant Design (AntD), typescript, jest, Axios, fetch API, sass, css, rollup, eslint, react, context

www.eurasiaprecept.org

The screenshot displays the Eurasia Precept platform with several open windows:

- Session Management:** Shows a list of sessions with details like title, date, and location.
- Event Invites:** Shows a list of invites with details like invitee, date, time, subject, and location.
- Event Details:** Shows a detailed view of an event invite for "Sedință și sesiunile de nivelul II și training" on June 22, 2020, at 19:00, in Moldova, Chisinau, Bd. Stefan cel Mare și Sfânt 105, for a Chemistry class with Professor Filat Vasile, Vasile Diaconu.
- Online Store:** Shows a list of items for sale, including "Facerea de ucenici în Sri Lanka" and "Școala Internațională de Misiune Invitați voluntari în călătorii misionare din 29 iunie - 1 iulie 2018 o călătorie misionară în Moldova, Chisinau, Bd. Stefan cel Mare și Sfânt 105" for a price of 1000.
- Blog/News:** Shows a post titled "Eurasia Bible Study Institute" with the text: "Our mission is to help people build a relationship with God through the knowledge of His Word." It includes a photo of a person writing in a notebook and a smaller photo of people in a study group.

KWG Group

Key Way Group is a team that generates game-changing ideas and aims for exceptional setup and growth options, delivered to their FinTech partners and stakeholders. As a company, KWG blends technology with a customer-centred and education-oriented approach to create true one-of-a-kind trading experiences. One of their golden contributions is delivering an out-of-the-box quality assurance and control solution for dedicated call-centre support lines, as well as content flow management and sentiment analysis of any given conversation, to keep an eye on NPS metrics. This is yet another, out of many, first leaps ahead powered by EBS. An extended Digital Transformation chain is currently ongoing, to supply true automation among setting-up operations in FinTech environments.

Used Technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, Monit daemon, NGINX, Python, Django, PostgreSQL, RabbitMQ, ElasticSearch, MongoDB, ReactJS, Ant Design (AntD), typescript, jest, Axios, fetch API, sass, css, rollup, eslint, react, context

www.keywaygroup.com

The image displays a composite view of the EBS Integrator platform and the Key Way Group website. The top portion shows a screenshot of the EBS Integrator dashboard, specifically the 'Call recording' module. The dashboard includes a search bar, filters for 'Brand/licence', 'Duration', 'From agent', and 'Extensions', and a date range selector for May and June 2021. The bottom portion shows the Key Way Group website, featuring a 'GLOBAL PRESENCE' banner with a city skyline, sections for 'Our Team', 'Our Mission', and 'Our Vision', and a CAPEX.com logo.

Microcapital

The MikroKapital Fund makes investments and loans to financial institutions, specialized in financing tiny, small, and medium size enterprises across CSI countries, Western Europe, and Central America. With a wide financial portfolio and a large stakeholder group, MikroKapital sought a convergent system to manage its human-financial assets, following internal policies and procedures. As a result, we have designed a tailored asset management platform, designed as comprehensive as an Enterprise Resource Management system, and as approachable as a CRM.

Used Technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, Monit daemon, NGINX, Python, Django, PostgreSQL, RabbitMQ, ElasticSearch, MongoDB, ReactJS, Ant Design (AntD), typescript, jest, Axios, fetch API, sass, css, rollup, eslint, react, context

www.mikrocapital.md

Fine Credit

Quick-Loan processing platform: "FineCredit" is a financing platform for a quick-cash provider that allows companies and retail financing seekers to calculate their rates, project their debt processing roadmap and seek approval from the financing provided, online. The service provides essential credit scoring, profile revision and online payment provisioning for debt collectors and debtors.

Used technology: Docker, Kubernetes, GIT, GitLab, NGINX, Python3, JSON, REST API, PostgreSQL, JavaScript, React.js, Typescript, Fetch API, SaaS, Eslint, React context

www.finecredit.md

The image displays the Fine Credit website across three devices: a desktop browser, a smartphone, and a tablet. The desktop view features a large banner with a smiling family and the text 'Spre o viață mai bună!'. Below the banner is a form for selecting a service (immobil or consumption credit), amount (15000 EUR), and term (15 months). The mobile and tablet views show a similar layout with the same banner and form, but the text is scaled down for smaller screens.

Pets4Homes

Multi-Sided VET Marketplace: Pets4Homes is a free to use, one-stop advertising platform designed for private individuals, responsible breeders and rescue centers. Pet adopters or potential buyers can use the service as a communication bridge in reaching advertisers. In addition to its base provisioning, the service features wellness-related advice and information related to pet care for potential owners.

Used technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, monit daemon, NGINX, PHP, MySql, RabbitMQ, websocket, varnish, memcached, Redis, CSS, jQuery, javascript, typescript

www.pets4homes.co.uk

The screenshot displays the Pets4Homes website with a search interface and a list of advertisements. The search bar at the top allows users to filter by Pet Type, Pet Breed, and Location. Below the search bar, a section titled 'Latest Boosted Adverts' shows several highlighted listings. The main content area is titled 'Pets in the UK' and shows a grid of pet ads. Each ad includes a thumbnail image, the pet type, breed, location, price, and a brief description. For example, one ad for '1 Boy 2 Girls Cavapoo Puppies' in Swansea is listed for £2,500. Another ad for a 'German Wirehaired Pointer Puppy' in Bexhill, Aragon, is listed for £2,500. The website also features a 'Pets4Homes' logo and a 'My Account' link in the top right corner.

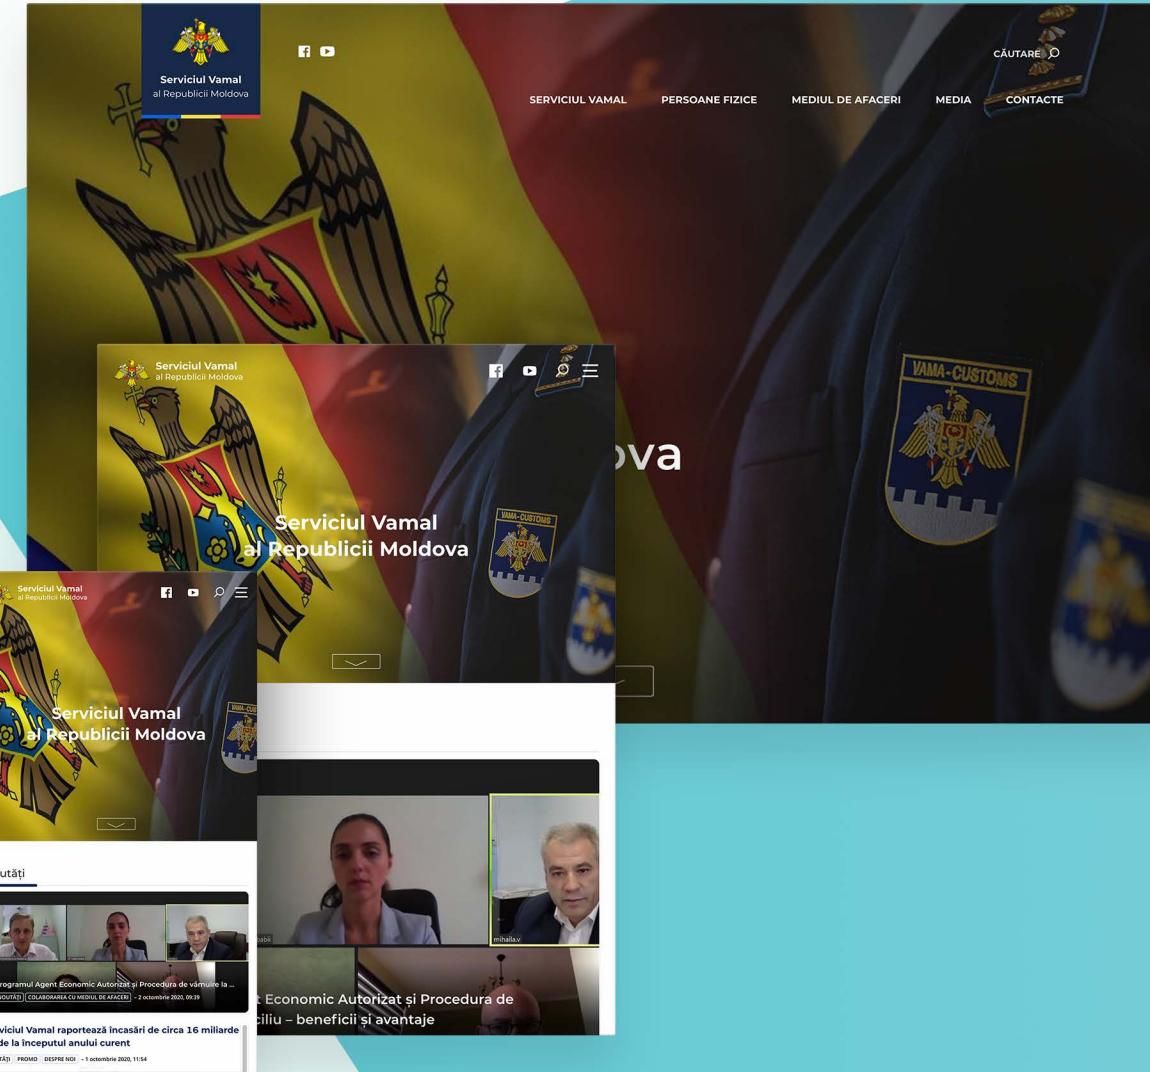

E-Customs

Multi-Sided Digital Transformation Platform:

E-Customs is an automated system that enables decentralization of tasks from central to local customs, covering customs duties, and customs valuation processes, applied to import-export goods. The multi-sided platform is sponsored by USAID within its Structural Reforms Program in Moldova and managed by the Moldovan Customs Service.

Used technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, monit daemon, NGINX, PHP, MySql, RabbitMQ, websocket, varnish, memcached, Redis, CSS, jQuery, javascript, typescript, sass, JSON, token, React.js, Ant Design, Typescript, Fetch API, SaaS, Eslint, React context

www.customs.gov.md

The Information Point for External Trade (TIP)

Multi-Sided consumer portal: The Information Point for External Trade, is a USAID sponsored platform, is a tool for businesses engaged in international trade, for authorities, as well as for other stakeholders that will be able to access first-hand reliable information with respect to customs legislation; customs regimes and destinations; declaration, classification and origin of goods; permits, and the rules for border crossing concerning goods and transportation units.

Used technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, monit daemon, NGINX, PHP, MySQL, RabbitMQ, websocket, varnish, memcached, Redis, CSS, jQuery, javascript, typescript, sass, JSON, token, React.js, Ant Design, Typescript, Fetch API, SaaS, Eslint, React context

www.trade.gov.md

The screenshot displays the main interface of the portal, which is a multi-sided consumer portal for external trade. It features a dark blue header with the portal's name in the center. Below the header, there are several navigation links and sections. The main content area is divided into several panels, each containing specific information and forms. One panel shows a search bar for 'Găsește poziția tarifară'. Another panel displays the 'Tariful Vamal Integrat al Republicii Moldova (TARIM)'. The portal also includes sections for 'Serviciul Vamal' and contact details for the Customs Agency (Agenția Servicii Publice). The overall design is clean and modern, with a focus on providing users with quick access to essential trade-related information and services.

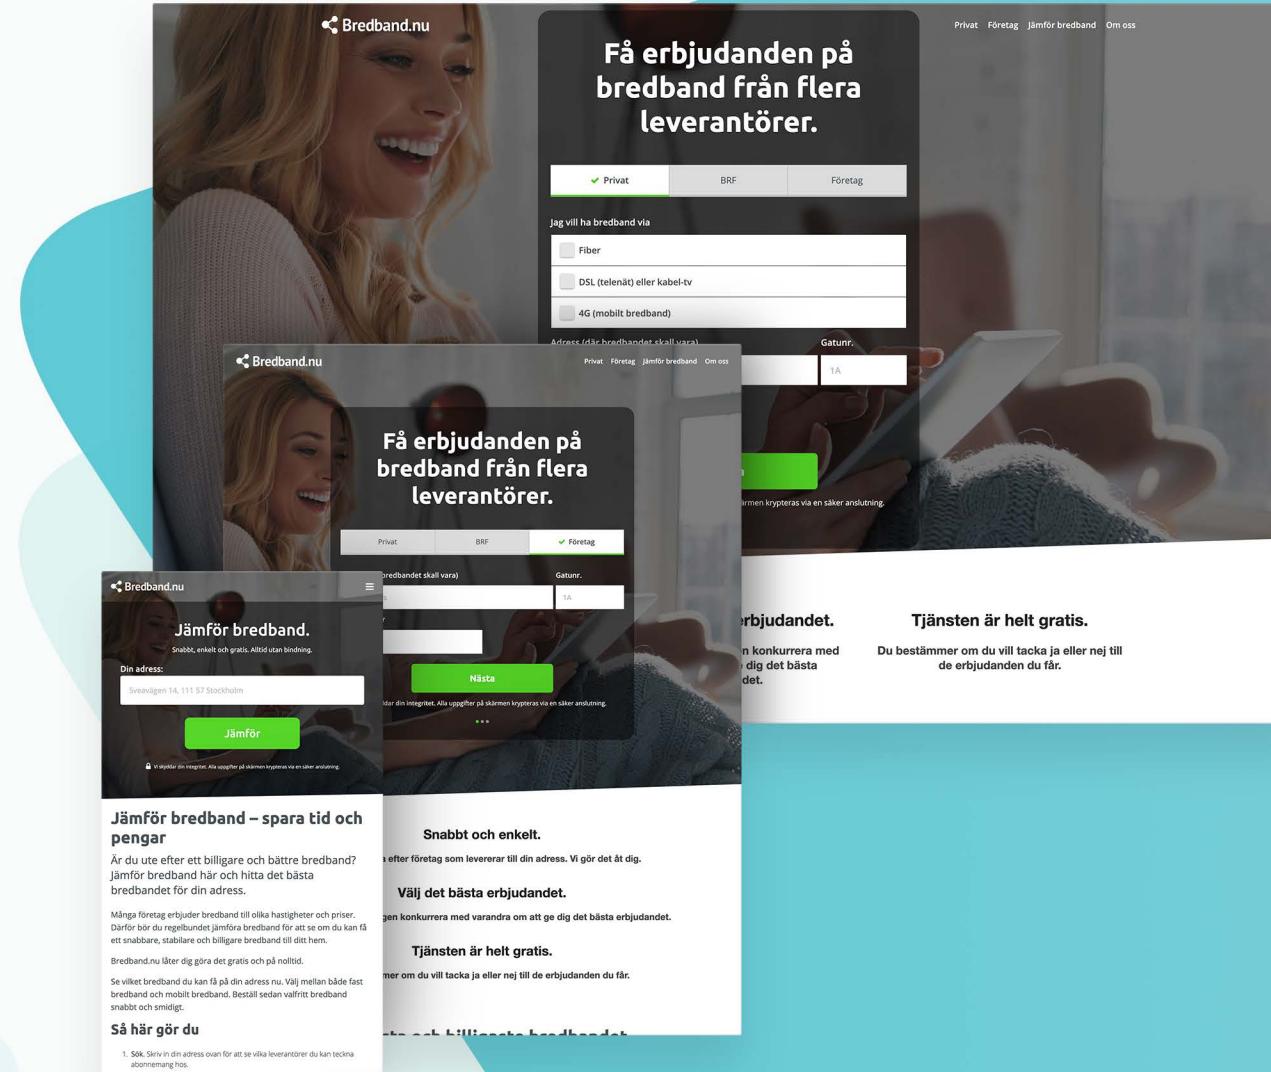

Bredband.nu

Multi-Sided Marketplace: Bredband.nu is a broadband marketplace on the Swedish market. The service allows its' users to get fast and cheap broadband adapted to their needs. By filling in a form on Bredband.nu the platform binds multiple service providers to deliver the best-fitting offer. The platform acts as a tender management service, ensuring personal data protection at every level before any acquiring decision is taken.

Used technology: Docker, Kubernetes, GIT, GitLab, Ansible, Graylog, Sentry, monit daemon, NGINX, PHP, MySQL, RabbitMQ, websocket, varnish, memcached, Redis, CSS, jQuery, javascript, typescript, sass, JSON, token, React.js, Ant Design, Typescript, Fetch API, SaaS, Eslint, React context, Ant Design

www.bredband.nu

ZoomCredit

Quick-Loan processing platform: "ZoomCredit" is a financing platform for a quick-cash provider that allows companies and retail financing seekers to calculate their rates, project their debt processing roadmap and seek approval from the financing provided, online. The service provides essential credit scoring, profile revision and online payment provisioning for debt collectors and debtors.

Used technology: JavaScript, HTML, CSS, Bootstrap

www.zoomcredit.md

The screenshot displays three separate loan application forms from the ZoomCredit website, each with a different background color (black, white, and light blue) and a different service name (Zoom Consum, Zoom Business, and Zoom Ipoteca) at the top. Each form includes fields for amount (2500 MDL), term (12 months), and a 'TRIMITE CERERE' (Send Application) button. The rightmost form (Zoom Ipoteca) also shows a summary table with data: Data rambursării: 05.10.2021, Plată totală: 3570.96 MDL, Plată lunară: 297.58 MDL, and TAE: 71.55 %.

Global Database

Multi-tier system: Private Backoffice, User Portal and public web interface

Global Database (GDB) is a business intelligence platform designed by EBS from scratch. The service provides company information within a convergent environment integrating workflow solutions. GDB operates with billions of records delivering data enrichment, credit checking and other niched insights for marketing, sales and financial executives.

Used Technology: Python, Django, PHP, Laravel, Spring, Java

www.globaldatabase.com

The screenshot shows the Global Database website homepage. The header includes the EBS Integrator logo, a language selector (English), and navigation links for Blog, Integrations, About us, Global Database, Products, Data Solutions, Customers, Pricing, Request a demo, and Sign in. The main content features a large banner with the text "Find, verify and sell to over +120M companies worldwide" and a subtext "Leading data solution that helps you discover and engage customers while staying compliant across global markets". Below the banner are three main sections: "Find new customers", "Verify and monitor your suppliers", and "Build products and automate processes". Each section includes a brief description, a "Free trial" button, and a "See how it works" button. Logos for SAP, wework, aws, and The Economist are displayed at the bottom. A sidebar on the right shows a QR code and the text "Scan this QR Code and find out more!".

Donate Smarter

Multi-tier system: Private Backoffice, NGO Portal, Corporate Portal, Dedicated hosted pages

Donate Smarter is an easy-to-use fundraising system developed for donors, NGOs and individuals that are willing to contribute to charities in a transparent way. The system allows tracking the impact generated by each contribution and facilitates charities to access various donations, with little or near-to zero paperwork.

Used Technology: Codeigniter (PHP), HTML5, CSS3

www.donatesmarter.com

The image shows a composite of two screenshots of the Donate Smarter website. The top screenshot displays the homepage for 'Swim Safe Forever Inc.' featuring a large image of a child swimming, a mission statement, and a sidebar with project categories like Recreation, Sports/Athletics, Animals, and Arts & Cultural. The bottom screenshot shows the 'Charity Search' page with fields for keyword, location, zip code, and radius, and a 'Search' button. It also includes a video player showing a child swimming and social sharing buttons for Facebook and LinkedIn.

YPTender

Multi-tier system: Private Back-office, Provisioning Portal, User Portal, Resolution Center

YPTender is a multi-tier bid and auctioning platform that enables transparency across government and public acquisition processes. Its engine is designed to work with the official Mtender.gov.md bidding service and is build according to public procurement reform guidelines. As a service, YPTender aims to eliminate corruption within public acquisition structures and determine true costs regards service provisioning.

Used Technology: HTML5, CSS3, ReactJS, Django, PostgreSQL, ElasticSearch, RabbitMQ

Louie7AI

With the world becoming cookie-less by 2023, and privacy regulations getting stricter by the day, delivering a personalized user experience might become a goal impossible to achieve. In comes Louie7A; a solution that delivers an exact end-user perspective, whilst still guaranteeing privacy and anonymity. All of this, achieved by using advanced AI (Artificial Intelligence) combined with ML (Machine Learning) to find common patterns of smartphone or web behaviour and by explaining the meaning of those patterns from a personality point of view, allowing a true first impression.

Used Technology: Python 3.8, Django Rest Framework 3.12.4 (DRF), JSON, PostgreSQL, Redis, JSON Web Tokens (JWT)

www.louie7ai.com

Don't treat your clients like they were all the same.

It's time to get personal.

Louie7AI is personalizing the digital experience and reinventing the Human-centric approach.

Using AI technology, behavioral psychology, and statistics, Louie7 generates customized personality insights. Its AI-driven engine provides human behavior prediction, enabling creation of the 4th dimension - the end user's personality in the digital space.

Louie7 is adding the human dimension to current analytics, leveraging your business activity to achieve your KPI's.

Analyzing new datasets by maintaining the highest level of customer privacy to predict customer behavior and recommend how to

Android, iOS

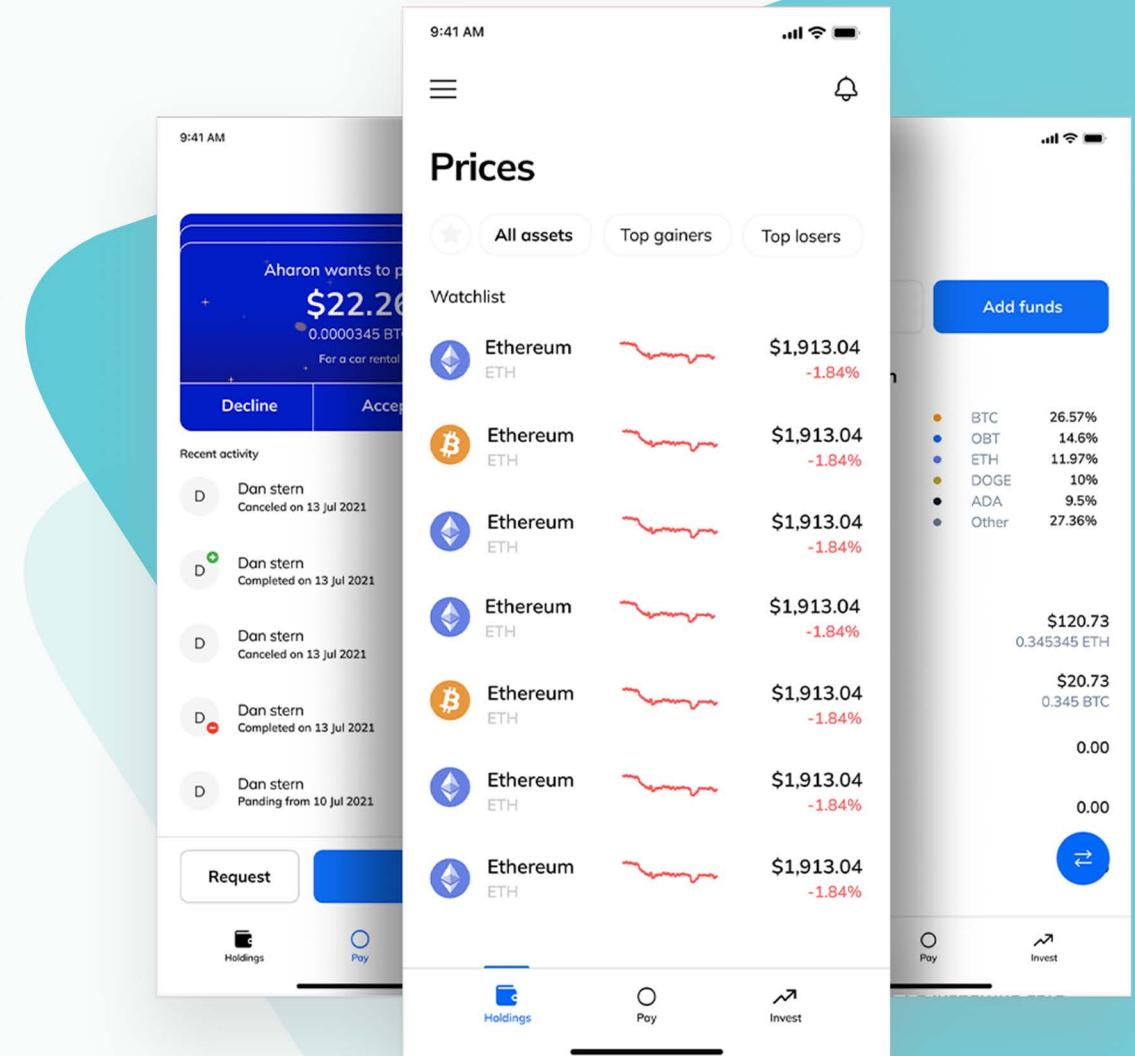

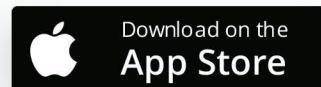

Oorbit

Oorbit launched in 2017 with a simple aim: to increase crypto adoption in everyday life. Today, users can take advantage of the huge benefits of the crypto world by harnessing the power of Oorbit. This means exchanging crypto payments worldwide with zero fees, from students, to hairstylists, to main street cafés and anything in between. All these operations powered by native Android and iOS wallets redefine how cryptocurrencies can effortlessly integrate into everyday life.

Used Technology: Swift 5, Storyboard, Auto-layout, VIPER architecture, Firebase Crashlytics, Fabric, XCTest, Kotlin, Junit, Dagger 2

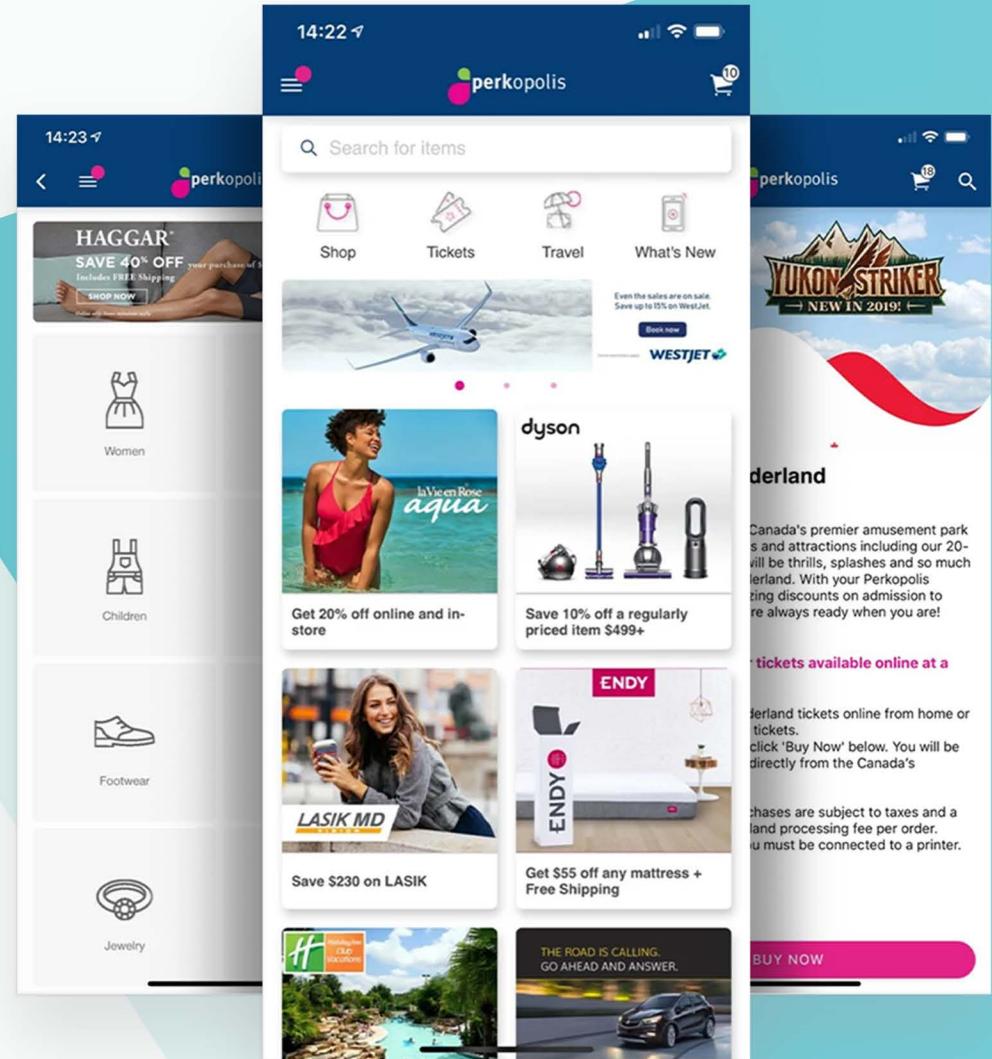

Percopolis

Perkopolis is Canada's leading provider of fully managed reward programs. Used by over 2,000 Canadian organizations, Perkopolis covers a wide range of incentives: from shopping, movies, theatre, attractions, travel, wellness, and food to any service that can generate a reward. Simply put, Perkopolis has something for everyone - be it an exclusive offer, discount, or great savings. End users can track and exchange rewards with their close ones, all within a common React Native codebase, that powers both Android and iOS versions of the app.

Used Technology: React Native

Google play

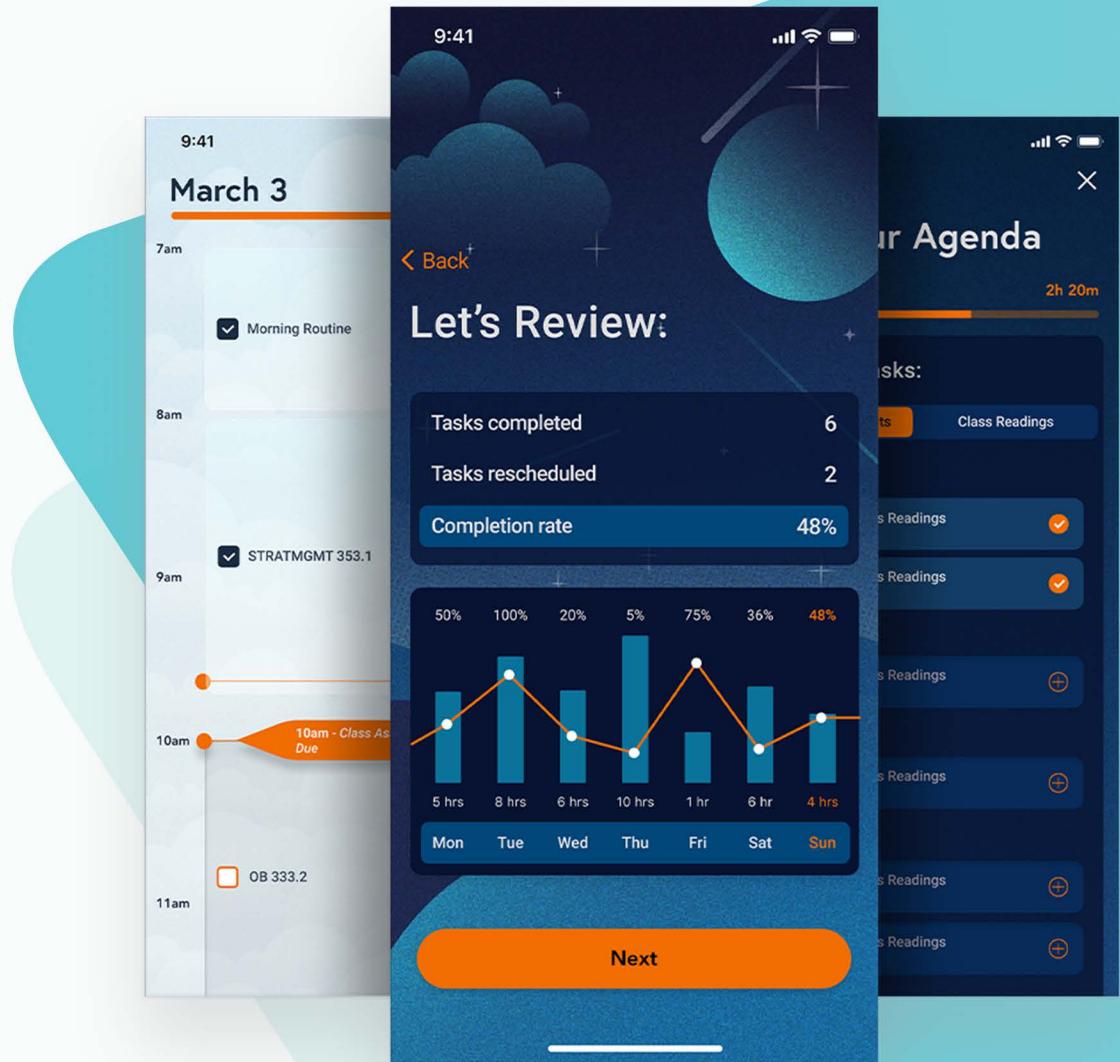

Procrastinauts

Since our modern environment prevents us from doing what we are supposed to be doing, PROCRASTINAUTS decided to fight that. Their time management tool aims to recentre focus, clean-up distractions and set a clear path to productivity. With PROCRASTINAUTS there is no space left for manipulations that tempt us into watching just one more cat video before bed. Designed for both: Android and iOS, PROCRASTINAUTS acts as an instrument that helps its users to focus on what matters and navigate the white noise.

Used Technology: Swift five, Storyboard, Auto-layout, VIPER architecture, Firebase Crashlytics, Fabric, XCTest, Kotlin, Junit, Dagger 2

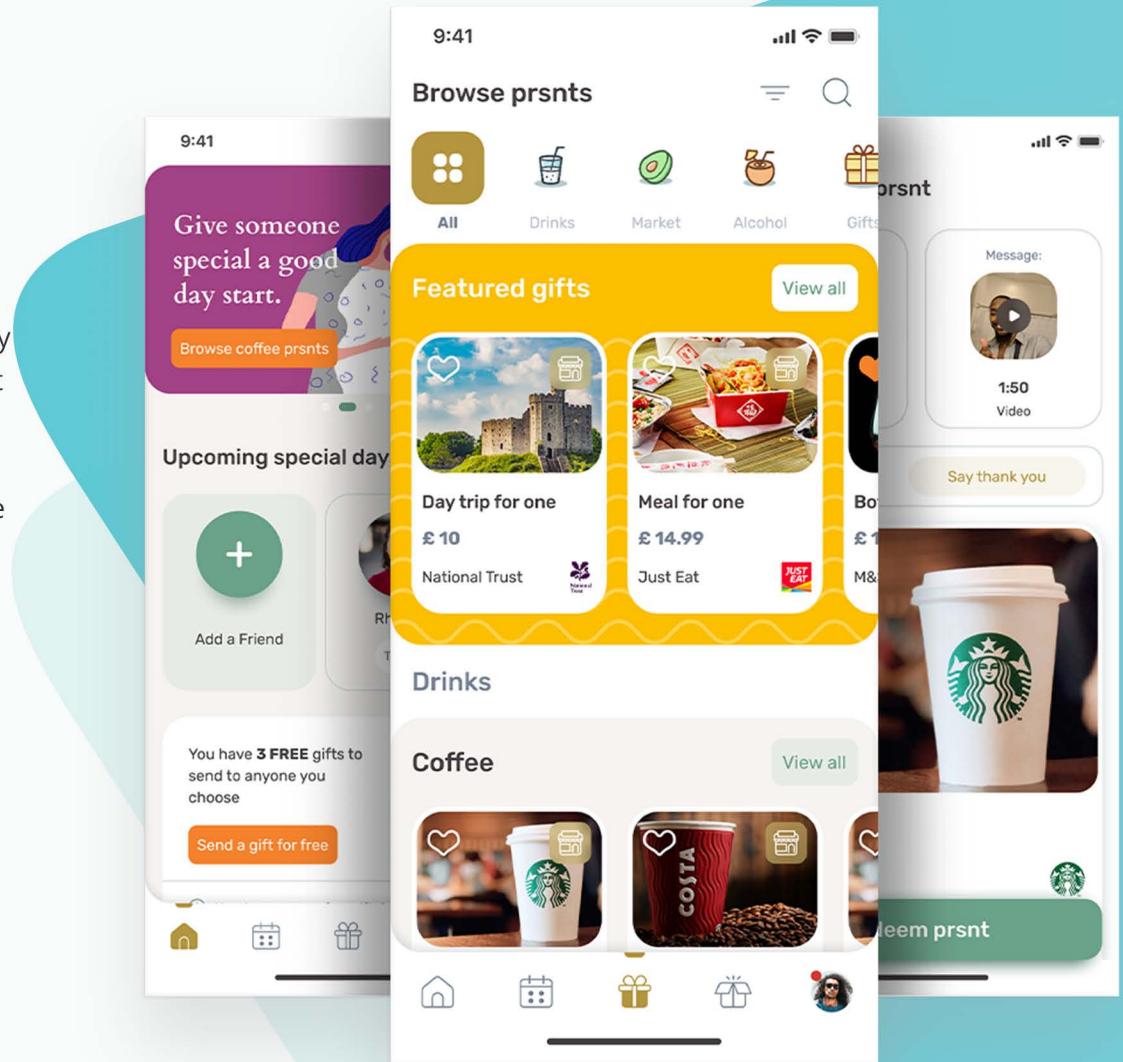

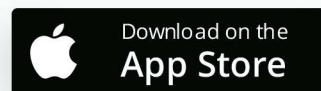

Prsnt

As a fully immersive gift-giving experience, Prsnt allows users to send people in their life the things they will genuinely love. Their e-gifting app makes the process of finding and personalizing a truly thoughtful gift effortlessly in a few simple taps. The app has a vast range of gift options that are suitable for any budget so you can celebrate everyone's special days. Prsnt gathers retail giants such as Amazon, M&S, or ASOS, delivering dozens of options for anyone looking to make someone's day truly special!

Used Technology: Swift 5, Storyboard, Auto-layout, VIPER architecture, Firebase Crashlytics, Fabric, XCTest, Kotlin, Junit, Dagger 2

Abraham's Legacy - Tehillim

Android & iOS

Abraham's Legacy is a digital platform that allows completing the book of Tehillim (psalms) thousands of times a day collectively with the entire world. The platform is designed to bring community members together for a common cause.

Used Technology: Native Android Java, Android Studio, Xcode, Swift, NodeJS, ExpressJS

 Download on the
App Store

 Get it on
